THE ONLY **PRO SHOP** **EXCLUSIVE** ARROW COMPANY

HOW DOES IT WORK?

Our business model is simple, we provide our Black Eagle Arrows Authorized Retailers the opportunity to **MAXIMIZE VALUE AND CUSTOMER SERVICE BY ELIMINATING BIG-BOX STORE COMPETITION.** This gives every retailer in our network the best product pricing instead of pricing models which require pro shops to subsidize their competition. We are the only arrow company in the industry who sustains these values. We have worked to build and maintain a trusted network of only independently owned and operated pro shops. With no minimums and superior customer service we give every pro shop large and small the opportunity to thrive. We work hard at producing quality products and just as hard at building quality relationships with our partners.

GREAT LAKES OUTDOOR SUPPLY
BAINBRIDGE, MADISON,
MIDDLEFIELD, CHESTERLAND

"For us at Great Lakes the choice to sell and support Black Eagle Arrows was simple when they offer an arrow with unmatched weight and straightness tolerances coming from genuine people that aren't just business partners, but our friends as well."

LANCASTER ARCHERY SUPPLY
LEOLA, PA

"We have been a Black Eagle Arrow distributor since 2012 as it was a natural fit with their commitment to innovating and building the best arrows for both 3D target and bow hunting."

XXX ARCHERY
RAINIER, OR

"Your bow is only as good as your arrow that's why I shoot and sell Black Eagle Arrows. They have the best tolerances and the best value in the industry."

SOUTH SHORE ARCHERY SUPPLY
RIVERVIEW, FLORIDA

"Little did I know [becoming a dealer] was one of the best business moves I had made in the 12 years of running South Shore. I am proud to be a dealer of Black Eagle arrows."

CARNIVORE

19/64" - HUNTING ARROWS

FLETCHED & SHAFTS

The Carnivore is our premium **100% carbon hunting / 3-D shaft**. It's flight characteristics were designed by experienced professional shooters to optimize speed, kinetic energy, and penetration for a wide range of environments. The Carnivores are each weight-sorted and spine-matched to offer the most consistent grouping. This shaft's exceptional durability and accuracy is sure to bring home the trophy.

.001 & .003" OR STRAIGHTER

± 1 GRAIN WEIGHT TOLERANCE

32" SHAFT LENGTH

SPECS / INCLUDED COMPONENTS

SPINE	INNER DIAMETER	OUTER DIAMETER	GPI
250	.2445"	.303"	9.7
300	.2445"	.296"	8.5
350	.2445"	.291"	7.5
400	.2445"	.287"	6.8

- Black Eagle Arrows Standard Nock - 10 Grains
- Carnivore Inserts - 14 Grains
- Bohning Blazer Vanes - 18 Grains (Fletched Only)

ULTRA-LIGHT ARROWS SPECS*

SPINE	INNER DIAMETER	OUTER DIAMETER	GPI
30-50 lb	.2445"	.281"	5.9

Perfect for those who shoot a lighter 30-50 lb draw weight.

*DISCLAIMER / Do not exceed 50 lb draw weight limit. It may damage the shaft and cause serious injury to you or others around you.

ZOMBIESLAYER

19/64" - HUNTING ARROWS

FLETCHED & SHAFTS

Zombie Slayers are a 100% carbon hunting / 3-D shaft. These shafts are engineered with speed and kinetic energy, designed to cause the maximum zombie face damage. These carbon Zombie Slayer arrows are manufactured with the tightest .001" or .003" straightness or straighter tolerances, to ensure you never miss that critical head shot.

.001 & .003" OR STRAIGHTER

± 1 GRAIN WEIGHT TOLERANCE

32.5" SHAFT LENGTH

ZOMBIE SLAYERS ARE NOT TOYS. THESE ARE REAL ARROWS AND CROSSBOW BOLTS INTENDED ONLY FOR REAL ZOMBIES, WALKERS, LIVING DEAD, ETC. NOT FOR USE ON LIVING HUMANS.

SPECS / INCLUDED COMPONENTS

SPINE	INNER DIAMETER	OUTER DIAMETER	GPI

OUTLAW TRADITIONAL FEATHERS

VINTAGE

19/64" - TRADITIONAL HUNTING ARROWS

CRESTED FLETCHED & SHAFTS

Our **Vintage® 100% carbon arrow** is the first of its kind on the market. Many serious traditional archers, and compound archers, are looking for a high quality wood grain carbon arrow – so we delivered. Each Vintage arrow's cresting is hand painted and quality inspected. The Duracoat wood grain overlay-finish on the shaft allows for refletching and cresting. Vintage arrows are straightness sorted, spine matched, and weight matched to ensure the quality and toughness that you have come to expect.

- 4" Feathers Barred and Solid - 3 Grains (Fletched Only)

CRESTED OPTIONS

INSTINCT

15/64" - TRADITIONAL HUNTING ARROWS

CRESTED, FLETCHED & SHAFTS

Our Instinct® arrow is the ONLY wood-grain-micro-diameter-carbon-traditional arrow on the market today. Designed to be more shootable, the Micro-Diameter size helps to offset the off-center design of most recurve and longbow risers made today. We also coupled the Instinct® with our SUPER TOUGH Stainless Steel outserts, that weigh 100 grains, so you can have the weight up front where you want it.

Each Instinct® arrow's cresting is hand painted and quality inspected. This gives you custom arrow quality, and an attractive traditional look, all at a VERY affordable price. The Duracoat wood grain overlay-finish on the shaft allows for refletching and cresting. Instinct® arrows are straightness sorted, spine matched, and weight matched—to ensure the quality and toughness that you have come to expect from Black Eagle Arrows. We feel that traditional archers should no longer have to use traditional arrows. Test your Instincts® and experience the Black Eagle difference today!

- 3" Shield Cut Feathers | Barred and Solid - 3 Grains

CRESTED OPTIONS

SPARTAN

18/64" - HUNTING ARROWS

CRESTED, FLETCHED & SHAFTS

The Spartan was developed from taking the best characteristics from larger 19/64" and smaller 17/64" arrows. We wanted the Spartan's outside diameter to be small for maximum accuracy and penetration. However, like larger arrows, we wanted the **100% carbon Spartan** to utilize an insert for easier arrow removal and to reinforce the front of the arrow for bone-shattering impacts.

.001 & .003" OR STRAIGHTER

± 1 GRAIN WEIGHT TOLERANCE

32" SHAFT LENGTH

Products are protected by United States Patent Nos. 7,004,859; 7,720,618; 7,374,504 and 7,608,001. Manufactured under license.

RAMPAGE

17/64" - HUNTING ARROWS

FLETCHED & SHAFTS

This small-diameter **100% carbon shaft** is designed to have superior long distance performance with spine-to-weight ratios creating a balance for optimal speed, kinetic energy, and penetration. The Rampage is an exceptional hunting arrow with no sacrifices to durability. It's the perfect shaft for any big game.

.001 & .003" OR STRAIGHTER

- Stainless Steel Bone Crusher Half-Out - 56 Grains
- Bohning Blazer Vanes - 18 Grains (Fletched Only)

RENEGADE

17/64" - HUNTING ARROWS

CRESTED FLETCHED & SHAFTS

The Renegade was designed specially for hunters who want a supremely accurate small diameter carbon arrow that is tough as nails - at a great price. This **100% carbon shaft** was designed to eliminate cross-wind drift, so it's perfect for those long-range shots. The flight characteristics of this extremely durable shaft ensure maximum power down range.

.005" OR STRAIGHTER

± 2 GRAIN WEIGHT TOLERANCE

32.5" SHAFT LENGTH

Products are protected by United States Patent Nos. 7,004,859; 7,720,618; 7,374,504 and 7,608,001. Manufactured under license.

DEEP IMPACT

15/64" - HUNTING ARROWS

CRESTED FLETCHED & SHAFTS

The name says it all. This incredibly light and strong micro-diameter shaft was developed using cutting-edge carbon manufacturing techniques. This **100% carbon shaft** uses fine-tuned spine-to-weight ratios to maximize speed, kinetic energy, penetration, and also to provide the flattest trajectory possible.

.001 & .003" OR STRAIGHTER **± 1 GRAIN** **WEIGHT TOLERANCE** **32" SHAFT LENGTH**

X-IMPACT

15/64" - FIELD / HUNTING ARROWS

FLETCHED & SHAFTS

We constructed the X-Impact from the highest quality materials to ensure it's the best micro diameter shaft on the market. This shaft is made of **100% High-Mod Carbon**, which means it's our lightest shaft available to date; this allows for more point weight up front, equating to better flight characteristics and long-range pin point accuracy. It's perfect for any hunter or target shooter who is looking for the highest quality long-range carbon arrow.

ARROW SELECTION GUIDE

THESE ARE GENERAL GUIDELINES. PLEASE SEE YOUR LOCAL BLACK EAGLE ARROWS DEALER FOR PROPER ARROW FITTING, OR CONTACT US DIRECTLY FOR ASSISTANCE.

This chart is based on a 100 grain point. If you use a 125 grain point, you may need to use a stiffer spine. If you use a 85 grain point, you may need to use a weaker spine.

In order to properly select the right arrows for your specific bow, you need to consider draw weight and arrow length.

As draw weight increases, so should arrow rigidity (spine). Also, we strongly recommend that you use an arrow with at least 5 grains of weight per pound of draw weight (if you are shooting a 60 lb. bow, use an arrow of no less than 300 grains). This includes your field point or broadhead.

For practical purposes, we use arrow length above draw length. Since the recent trends have been toward drop-away style arrow rests which are mounted to the rear of the riser, arrow length and draw length are no longer evenly proportional. Given a specific arrow spine, an arrow that is shorter will be more rigid than a shaft of the same spine that is longer. For example, if you have a 60 lb. bow with a 24" arrow, you would need a more flexible shaft than a 60 lb. bow with a 30" arrow.

COMPOUND SIZING CHART

RECURVE	COMPOUND	ARROW LENGTH									
BOW WEIGHT	BOW WEIGHT	23"	24"	25"	26"	27"	28"	29"	30"	31"	32"

SAFETY INFORMATION

PROPER ARROW SPINE SELECTION:

SHOOTING AN UNDER-SPINE ARROW CAN/WILL SIGNIFICANTLY INCREASE THE RISK OF INJURY TO THE SHOOTER AND YOUR EQUIPMENT.

Shooting a weaker spine arrow to get a few feet per second is a great risk. The added speed and stress on the under-spined carbon arrow shaft will, overtime, significantly increase the risk to the shooter and anyone in the vicinity. We have gone through great lengths to ensure our spine chart is accurate. Our arrow spine chart matches our arrows abilities in regards to your specific draw weight and draw length. It is vitally important that arrow safety start with the proper arrow selection.

INSPECT COMPLETE ARROW, FLEX AND TWIST EACH SHAFT BEFORE EACH SHOT:

It is critical to carefully inspect each shaft, for any damage to the carbon, before each shot. If there are any irregularities in the carbon, it may cause bodily injury, and may also affect performance. Any hard surface may cause damage to the carbon, including lost points buried in targets.

BE SURE TO INSPECT COMPLETE ARROW, FLEX AND TWIST EACH SHAFT BEFORE EACH SHOT.

IT IS CRITICAL YOU INSPECT THE COMPLETE ARROW, FLEX AND TWIST EACH SHAFT BEFORE EACH SHOT. THIS BECOMES CRITICAL IF YOU SHOOT GROUPS OR TOURNAMENT ARCHERY WHERE ARROWS AND NOCKS ARE GETTING BANGED UP AND BROKEN.

TO PERFORM AN ARROW INSPECTION:

BE SURE TO USE EYE PROTECTION DURING THIS PROCESS -

It is critical to carefully inspect each shaft, for any damage to the carbon, before each shot. If there are any irregularities in the carbon, it may cause bodily injury, and may also affect performance. Any hard surface may cause damage to the carbon, including lost points buried in targets.

If you suspect an arrow has been damaged in any way, immediately discard that shaft. Do not shoot a damaged arrow - it can cause injury to you and those around you.

Grasp the arrow shaft at each end (the closer to the each end the better) and bend the shaft creating no more than a 1-2" arch. When bending the shaft listen for any cracking while monitoring for any cracks or nicks. Rotate the shaft slightly and repeat this process until you have completed this for the entire arrow. Twist the shaft and listen for any cracking while monitoring for any cracks or nicks.

Review the whole shaft for any imperfections, paying careful attention to include the nock itself. Everyone loves to shoot groups and the nock being intact and free from any cracks or damage is critical to arrow safety.

If you suspect an arrow has been damaged in any way immediately discard this shaft. Do not shoot a damaged arrow or it will cause injury to you and those around you.

AWARENESS OF YOUR SURROUNDINGS:

Always be aware of what resides behind your target. Never shoot an arrow without a safe shooting lane.

Never shoot your bow without getting your bow inspected, including getting your arrow shafts measured by an experienced professional. Failure to cut your arrow shafts to the proper length will result in overdraw which may cause severe injury or death. Always adjust your arrow rest to accommodate the diameter of your arrow shafts - not doing so may cause severe injury or death.

Zombie Slayers are not toys. These are real arrows and crossbow bolts intended only for real zombies, walkers, living dead, etc. Not for use on living humans.

ULTRA-LIGHTWEIGHT SHAFTS:

This 30-50 lb ultra-lightweight shaft was designed to be shot from bows with a draw weight between 30-50 lb. Do not exceed 50 lb draw weight limit, or it may damage the shaft and cause serious injury to you or others around you. Always inspect complete arrow, flex and twist shaft before each shot. Do not shoot damaged shafts.

SHAFT CUTTING WARNING:

Only use a arrow shaft cutter designed to cut carbon shafts. Carbon shaft saws are designed to cut at a specific RPM that will not damage the shaft. Using a shaft cutter not designed for carbon will destroy a carbon arrow shaft.

Never aim your bow toward any person, animal, or property as it can cause serious injury, damage, or death. Always be sure to be aware of your surroundings as arrows can deflect off a hard surface and cause unintended injury or death.
